Gabriel Francisco de Souza

Equities Trading Desk Operator

Electronic trading · Platforms · Automation and AI

Profile

6+ years at brokerage firms and trading desks, now trading equities at Monte Bravo. I have worked across the full electronic trading chain: middle office, DMA, FIX integrations and proprietary desk management. With a Computer Science degree, I build systems and automations with Python, n8n and generative AI that take routines off spreadsheets and organize client follow-up.

6+ years	**2 years**	**10 projects**	**AI**
at brokerages and desks	managing prop trading desks	systems and automations built	n8n, APIs and generative AI

Experience 01

Oct 2026
present

Monte Bravo
Equities Trading Desk Operator

- Proactive client relationships for equities trading, focused on index (WIN) and dollar (WDO) mini futures.
- Operational and platform support (ProfitChart / Nelogica), including strategy automation plans.
- Built tools for the team with the help of generative AI, such as an in-house CRM and a client Kanban board.

May 2025
Oct 2026

Warren Investimentos
Middle Office Support Analyst (Mid-level)

- Client support via chat, phone and WhatsApp; account opening, setup and review.
- Dedicated support for HFT clients: log and FIX session analysis, platform setup and training.
- Built tools that automated team routines: daily brokerage fee reconciliation, an internal fees portal and a sales follow-up app.

May 2024
Mar 2025

Master Corretora
Middle Office Support Analyst (Mid-level)

- Multichannel client support, account opening and setup.
- Log and FIX session analysis; support and training on trading platforms.

CAREER

- Multichannel support, account opening and platform support.

Projects

CRM for an advisory team
CRM.GFRANCIS.COM.BR · WEB

The team's in-house CRM, with a client Kanban and role-based access (advisor and manager).

Advisor Radar
WEB · SALES INTELLIGENCE

Reads the contact history and suggests who to reach out to today, through which channel, at what time and with which message.

Proprietary desk billing
PYTHON · DESKTOP

Closes the monthly billing from spreadsheets, with discounts, alerts and invoices sent by email. Started as a VBA macro.

Deals automation
N8N · APIS · TELEGRAM

Workflows that find deals on Mercado Livre and Shopee, generate affiliate links and publish them automatically.

Team Kanban
WEB · CLOUDFLARE

A shared board for ideas and deliverables, with different access for managers and advisors.

Expense Tracker
WEB · PER-PERSON LOGIN

Monthly balance, upcoming bills, budget, investments and receivables.

Brokerage fee reconciliation
PYTHON · DESKTOP

Cross-checks the daily spreadsheets, flags mismatches by Sinacor code and generates correction files.

Sales follow-up app
SUPABASE · NETLIFY

3-stage funnel, messages by lead temperature and daily CRM import.

Internal reference portal
WEB · LOGIN AND ADMIN

Brokerage fees, position-closing costs and platform waivers, with bulk CSV import.

Client record matching
WEB · PDF AND EXCEL

Matches order lists (PDF) with client records (Excel/CSV) by tax ID and name and exports to Excel.
